DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The abstract of the disclosure is objected to because in line 1, "[d]escription of" is a phrase which can be implied and should not be used in the abstract. Correction is required. See MPEP § 608.01(b).

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The disclosure is objected to because of the following informalities: Appropriate headings should be used throughout the instant specification.

Art Unit: 1732

Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-10 and 12-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is a lack of agreement between the preamble and body principally because the preamble recites a process of making an embossed foil, but the body does not positively recite formation of an embossed foil (this rejection may be overcome by replacing the word ``embossed'' in line 1 with the word - - grained - - ; note that claim 11 has not been rejected because claim 11 recites formation of an embossed foil).

In claim 8, units of distance (e.g., millimeters) are missing.

In claim 13, the phrase ``the composite structure containing same'' does not have clear and proper antecedent basis in the claims principally because claim 1 (from which claim 13 depends) does not recite a composite structure.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1, 2, 8, 9 and 11-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Scholz et al (U.S. Patent 4,740,335).

Scholz et al (abstract; col. 1, line 7 to col. 7, line 39) teach a process of making an embossed foil from a material containing non-interlaced (i.e., non-crosslinked) polyolefins including the steps of treating the material with electron beams (the foil has a density of 0.93 grams per cubic centimeter), embossing the foil and deep drawing the embossed foil as set forth in the instant claims.

Allowable Subject Matter

10. Claims 3-7 and 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
